Amos P Alex

FLUTTER DEVELOPER

OBJECTIVE

I am a dedicated Flutter developer deeply passionate about creating immersive applications that captivate users and drive business growth. With a knack for marrying creativity with technical powers. I specialize in delivering visually stunning interfaces coupled with seamless user interactions.

EXPERIENCE

FLUTTER TRAINEE, LUMINAR TECHNOLAB

Sept 2023-Feb 2024

Successfully completed a 6-month Flutter training program at Luminar Technolab, specializing in mobile app development. Developed expertise in Flutter framework, with a focus on creating dynamic and responsive cross-platform applications.

PROJECTS
d-Note: A Flutter-Powered Digital Notebook App

In the creation of d-Note, a cutting-edge digital notebook mobile app built on the Flutter framework, I envisioned a seamless and personalized note-taking experience for users. Key highlights are-
1.) Personalized Notebooks: Users have the freedom to craft bespoke digital notebooks, tailoring each to their unique preferences and requirements.
2.) Effortless Sharing: Implemented an intuitive sharing feature, allowing users to effortlessly share their notes with friends through a simple link. This facilitates easy collaboration and access among fellow app users.
Additionally, I have hands-on experience crafting diverse UI designs, ranging from small-scale to large-scale projects, showcasing my proficiency in creating visually appealing and user-friendly interfaces.

DISCLAIMER
I herby declare that all of the above-mentioned information is true to the best of my knowledge.
